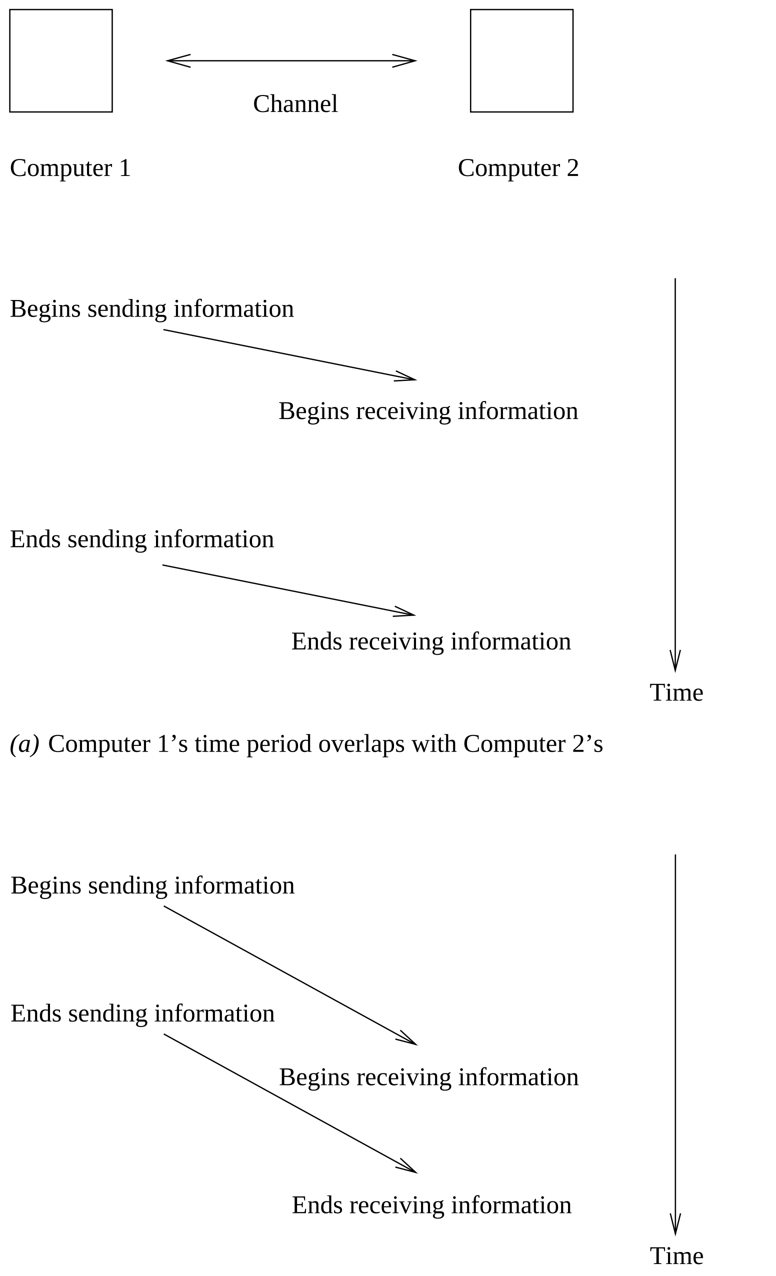
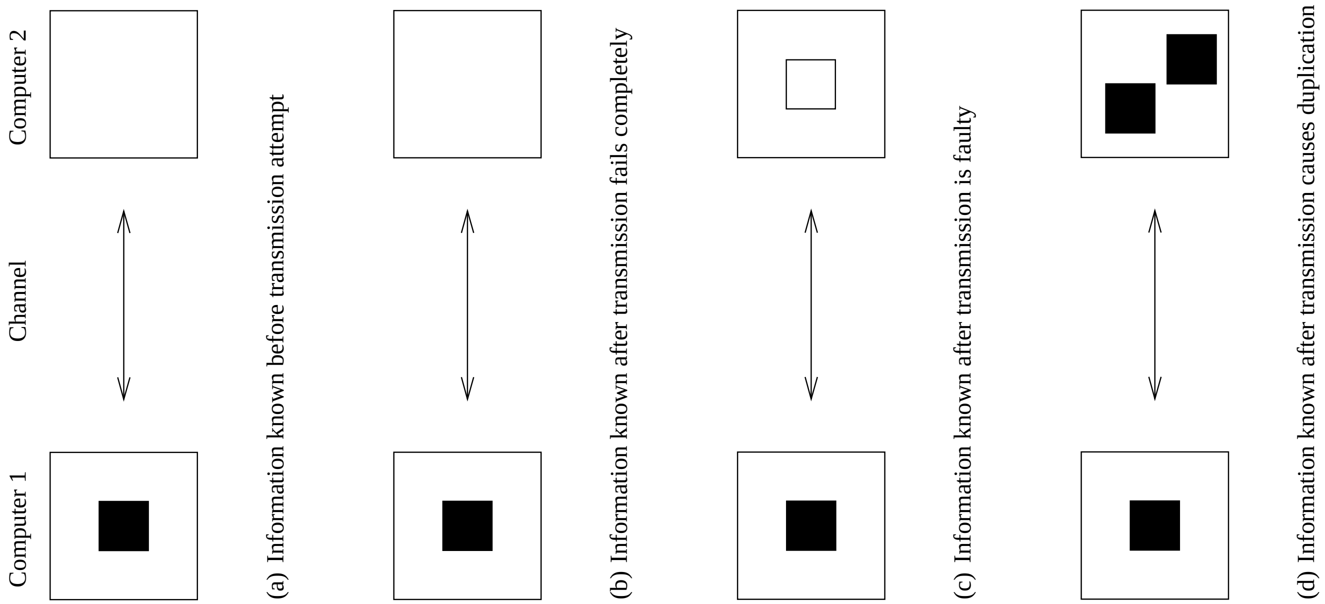
Gordon Brebner

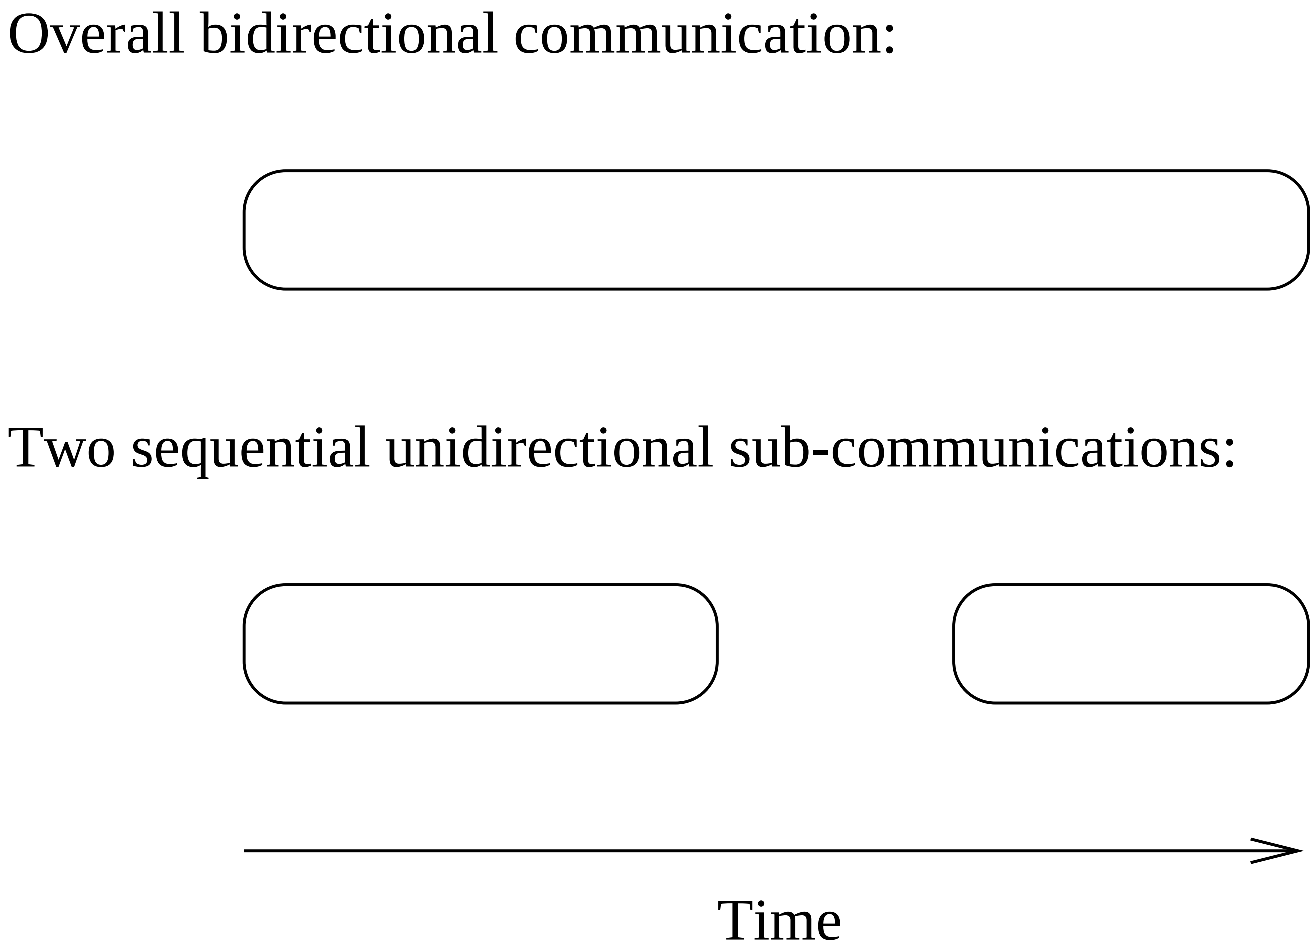


(b) Computer 1’s time period does not overlap with Computer 2’s

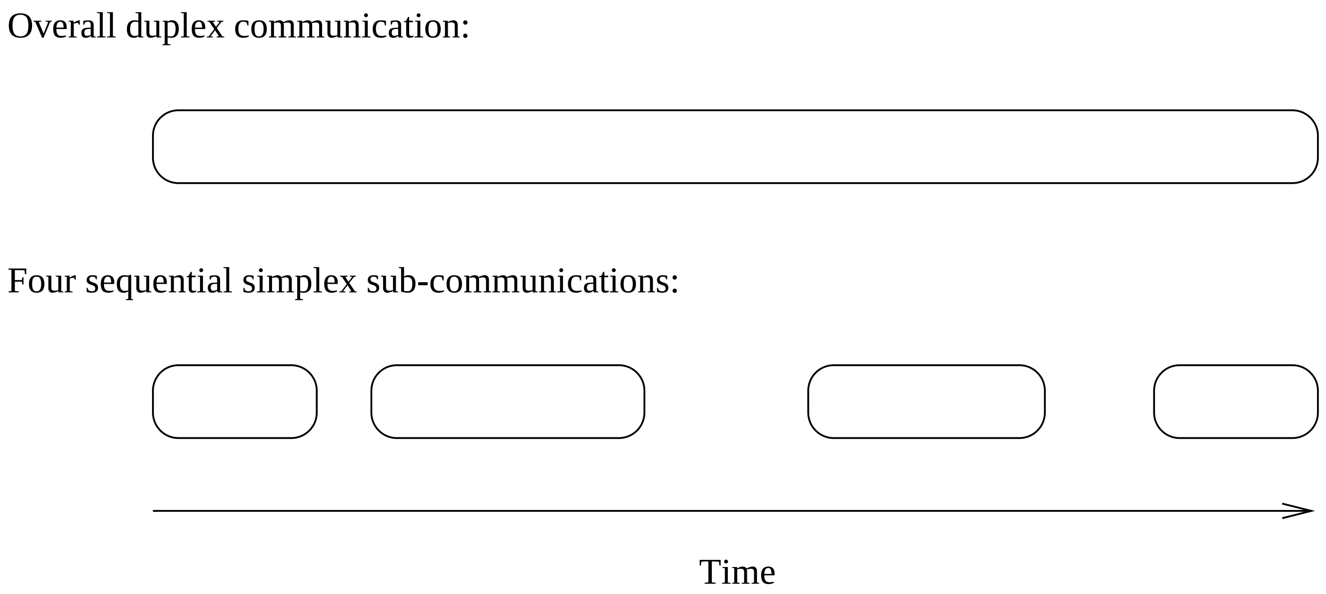
Communication involving an unsegmented time package



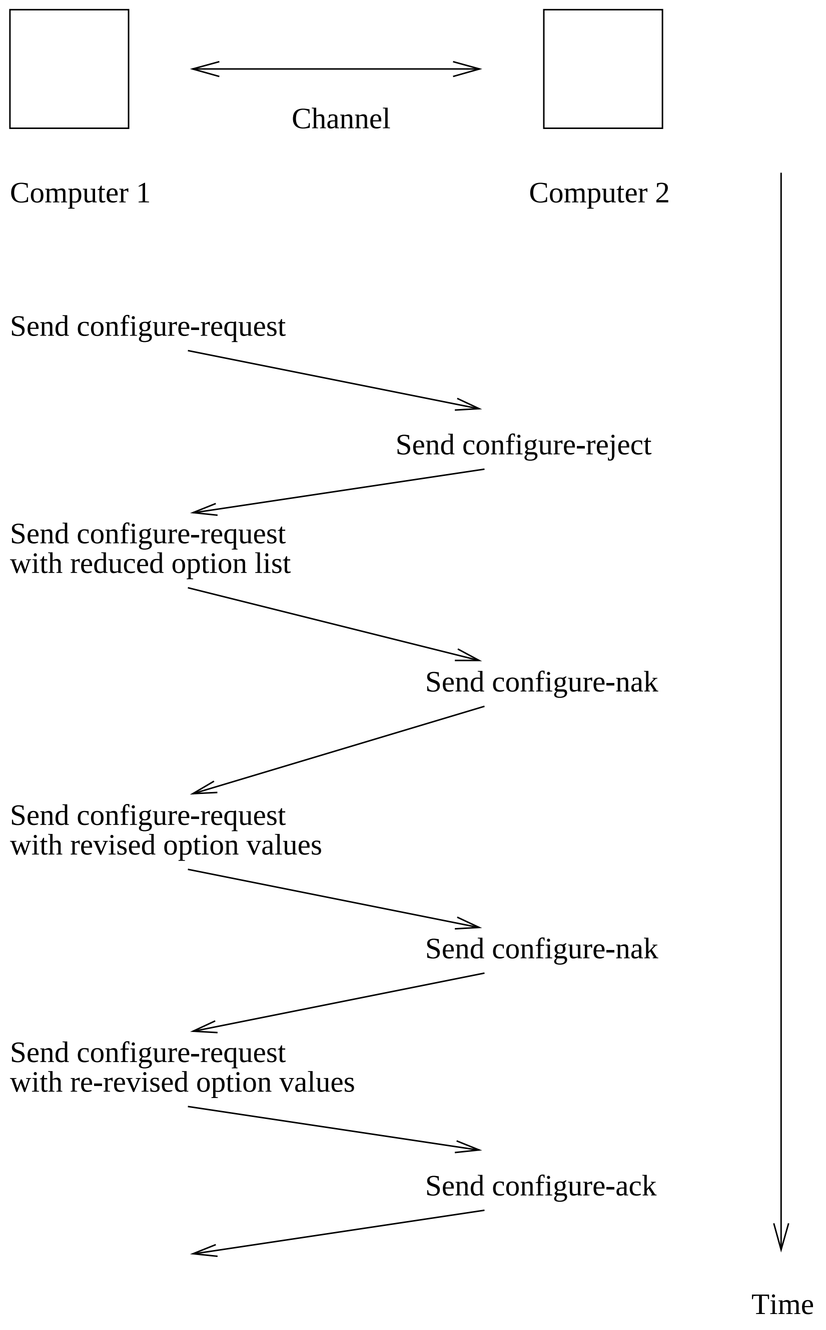
Possible failures for a connectionless service



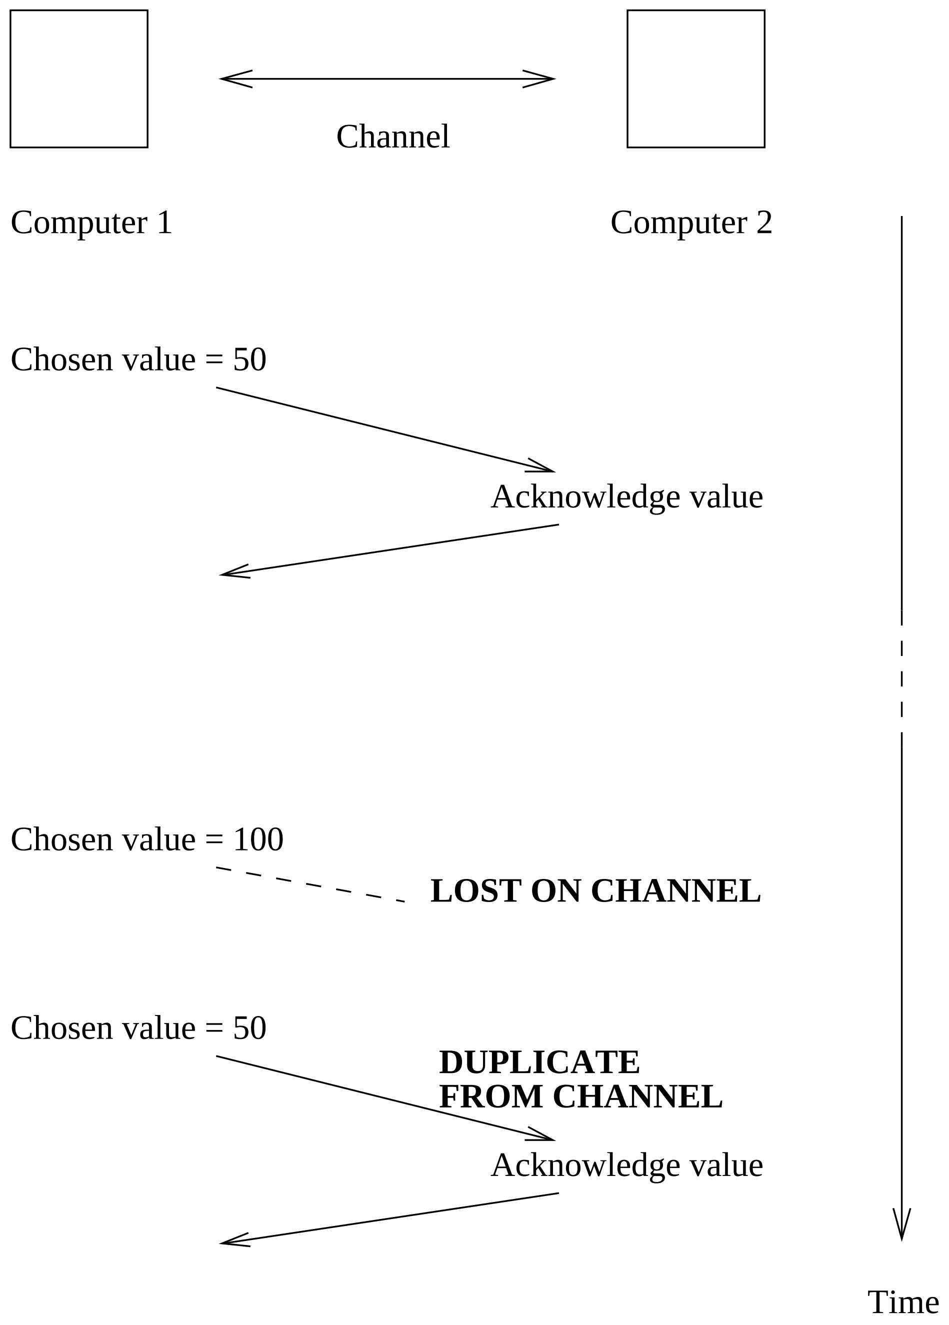
Communication involving a simple handshake time package



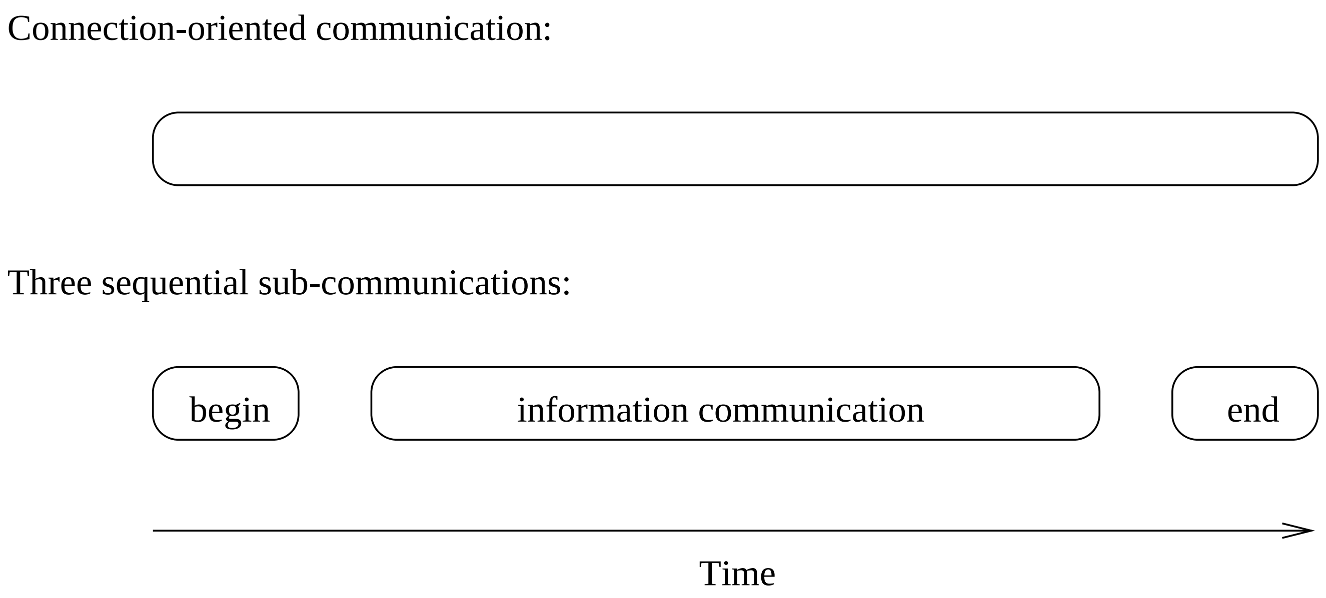
Communication involving a four-stage handshake time package



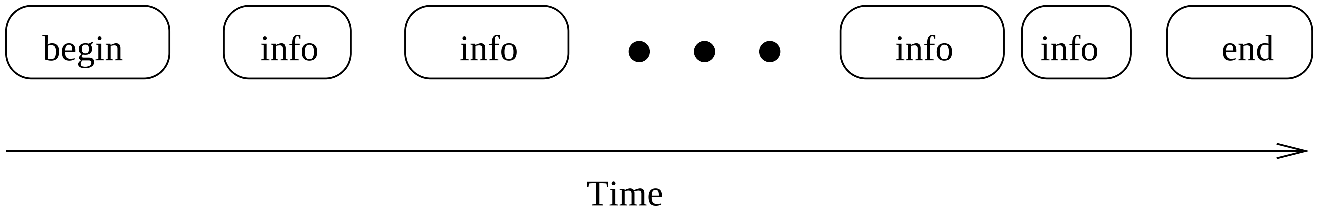
Example of Link Control Protocol negotiation



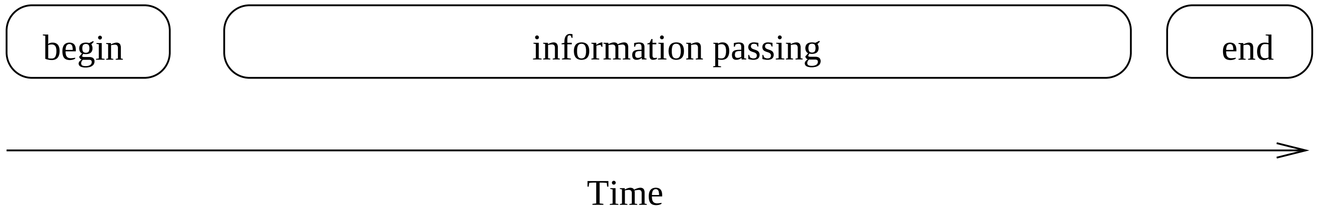
Problem at beginning of TCP communication



Communication involving a connection-oriented time package

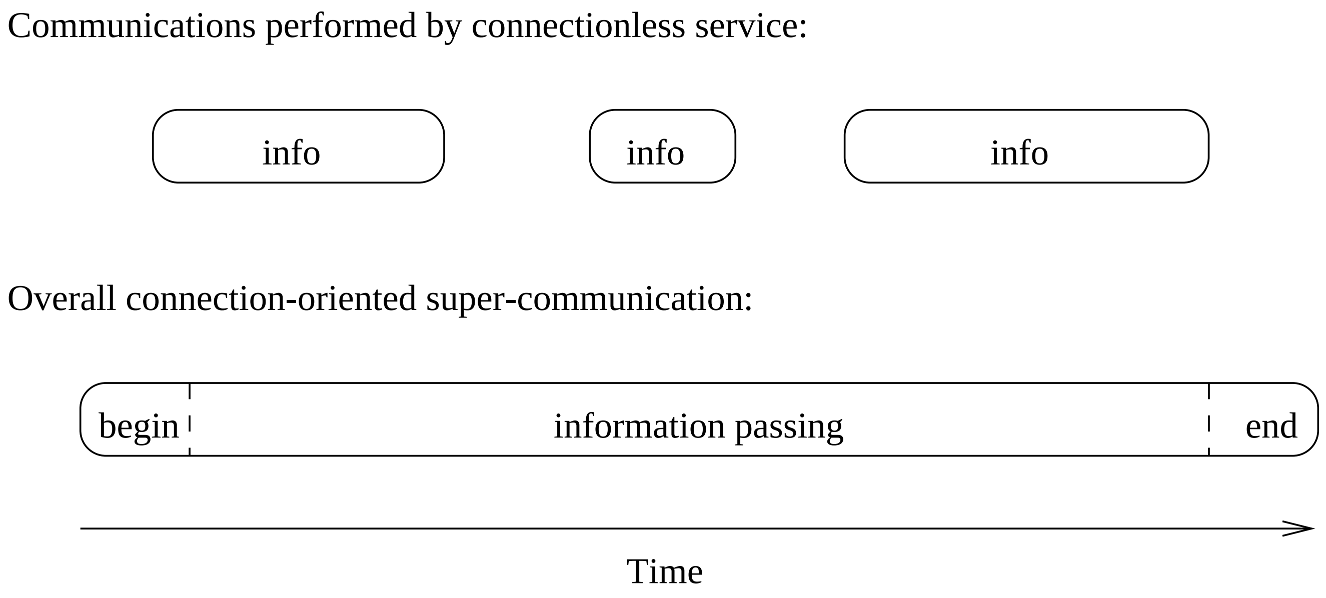


(a) Unit-oriented time behaviour of connection



(b) Stream-oriented time behaviour of connection

Unit-oriented and stream-oriented time behaviour



Concatenation of connectionless communications
